### Description of Building Product

The EliteFence is a modular aluminium solution designed for residential, commercial, landscaping, privacy, and perimeter fencing applications.

This customisable, DIY-friendly system features a patented push-together assembly that requires no welding or screws. Manufactured from durable 6063-T6 aluminium alloy, it offers excellent strength and corrosion resistance. The product is available in a range of Interpon (D1000 series) powder-coated colour options, providing a high-quality, weather-resistant finish.

The EliteFence system is offered with two slat lengths: 1800mm or 2400mm. These slats are assembled in fence posts (max height 1800mm) and can be complemented with additional accessories such as base plates and extra slats. Slat spacing can be adjusted from the standard 9mm spacer blocks to 20mm spacer blocks. Both slats and frames can be cut on-site to meet specific width and height requirements. A standard-sized EliteFence gate kit, measuring 1800mm x 1000mm, is also available.
