DESIGNED TO MOVE WITH YOU

Modular Handrail System

Promenaid is a modular aluminium handrail system designed to bring together clean architectural styling, everyday functionality and installation flexibility. Suitable for residential, commercial and accessibility-focused environments, the system adapts seamlessly to stairs, corridors, ramps and walkways - indoors or out.

CHANNELUX™ LIGHTING

Subtle illumination. Seamless integration.

Promenaid 2.0 has the option of Channelux™ integrated lighting modules that provide low-level illumination while maintaining the clean visual line of the Promenaid system. Modules install directly within the patented continuous channel, allowing flexible placement, simplified wiring and streamlined integration across a wide range of applications.

WEATHERPROOF DESIGN

Suitable for indoor or outdoor applications, Channelux™ LED modules can withstand rain, snow, and temperature changes.

COMMERCIAL RATED

Engineered for high-traffic areas, these durable LED modules meet commercial building standards and codes.

SIMPLE WIRING

Integrated channel design simplifies wiring and installation.
